

**Exam : EMC E20-001**

**Title : EMC Storage Technology  
Foundations**

**Version : Demo**

---

## Important Note, Please Read Carefully

### Other PassQuick products

[All passquick IT Exam Products](#)

### Our products of Offline Testing Engine

Use the offline Testing engine product to practice the questions in an exam environment.

Build a foundation of knowledge which will be useful also after passing the exam.

### Explanations

This product does not include explanations at the moment. If you are interested in providing explanations for this exam, please contact [pass-quick\(at\)hotmail.com](mailto:pass-quick(at)hotmail.com).

### Guarantee

Passquick provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!.

### Features

1. Comprehensive questions with complete details
  2. Instant Downloadable in PDF form.
  3. Verified Answers Researched by Industry Experts
  4. Questions accompanied by exhibits
  5. Drag and Drop questions as experienced in the Actual Exams.
  6. These questions and answers are backed by our GUARANTEE.
  7. Questions updated on regular basis.
  8. Like actual certification exams our product is in multiple-choice questions (MCQs).
-

1. What is the role of a bus?

- A. Control point for all host activities and resources
- B. Device for storing data
- C. High speed interconnect between CPU, memory, and disks
- D. Temporary location for commands and data

**Answer: C**

2. Which statement accurately describes parity-based RAID?

- A. Parity is read each time a read is performed
- B. Parity is updated only when a full stripe is read
- C. Parity is updated each time a write is performed
- D. Parity is updated only when writes fill a stripe

**Answer: C**

3. Which EMC Celerra component allows management of volumes and filesystems?

- A. Control Station
- B. Data Mover
- C. Disk Array Enclosure
- D. Storage Processor

**Answer: A**

4. Many FCAL nodes are attempting to simultaneously send I/O to a storage array. How is control of the loop determined?

- A. Hub bypass circuit
- B. Hub name service
- C. Node that owns the token
- D. Node with the highest priority

**Answer: D**

5. Which statement describes the iSCSI protocol?

- A. ATA over SCSI
- B. IP over SCSI
- C. SCSI over ATA
- D. SCSI over IP

**Answer: D**

6. Which statement describes Content Address (CA)?

- A. A set of functions that enable communication between applications
- B. An identifier that uniquely addresses the content of a file and its location
- C. An identifier that uniquely addresses the content of a file and not its location
- D. An identifier that uniquely addresses the content, quality, condition and other characteristics of data

**Answer: C**

7. Which local replication technology does EMC TimeFinder/Mirror implement?

- A. Copy on First Access
- B. Copy on First Write
- C. Full Volume Mirroring
- D. Pointer based

**Answer: C**

8. What is a remote replication solution for EMC CLARiiON storage systems?

- A. EMC MirrorView/A
- B. EMC SnapView
- C. EMC SRDF/AR
- D. EMC TimeFinder

**Answer: A**

9. What is monitored as part of a SAN health check?

- A. Disk status
  - B. Fan-in/Fan-out ratio
-

- C. ISL utilization
- D. Port status change

**Answer: D**

10. Which two mechanisms can be used to address threats of user privilege elevation?

- A. Access Control Lists (ACLs) and access control to storage objects
- B. Access control to storage objects and storage access monitoring
- C. User authentication and Information Rights Management (IRM)
- D. User authentication and user authorization

**Answer: D**

11. What are the five core elements of a data center infrastructure?

- A. Applications, Databases, JBOD, Networks, Storage Arrays
- B. Applications, Databases, Servers/Operating Systems, DAS, NAS
- C. Applications, Databases, Servers/Operating Systems, Networks, Storage Arrays
- D. Applications, Databases, Servers/Operating Systems, SAN, JBOD

**Answer: B**

12. In an EMC Symmetrix array, which component provides physical connectivity to hosts?

- A. Back-end adapter
- B. Cache
- C. Front-end adapter
- D. Storage Processor

**Answer: A**

13. Why would you implement an iSCSI solution?

- A. All storage arrays supply GigE ports
  - B. Block storage over IP is much faster than FC
  - C. iSCSI HBAs are inexpensive
  - D. Leverages existing IP network infrastructure
-

**Answer: B**

14. What is the correct order of operations for array-based synchronous replication?

- A: Write is received by the source array from host/server
  - B: Remote array sends acknowledgement to the source array
  - C: Source array signals write complete to host/server
  - D: Write is transmitted by source array to the remote array
- A. A, B, C, D
  - B. A, D, B, C
  - C. C, D, B, A
  - D. D, C, B, A

**Answer: A**

15. Which management task eliminates single points of failure in a data center?

- A. Availability
- B. Capacity
- C. Performance
- D. Security

**Answer: B**

16. What is a server capacity management task?

- A. Establishing user quotas
- B. Installing multi-path software
- C. Maintaining user logins
- D. Monitoring faults and events

**Answer: C**

17. A LUN is created from three disks using one partition from each of the disks. When this LUN is presented to the host, how does the host view this LUN?

- A. As three separate partitions
-

- B. As a striped partition
- C. As a concatenated partition
- D. As a single disk

**Answer: C**

18. Which failure does RAID technology guard against?

- A. Disk failure
- B. Host Bus Adapter failures
- C. Host failures
- D. Switch failure

**Answer: C**

19. What is the name of the drive sub-assembly containing the platters and read/write heads?

- A. ATA
- B. SATA
- C. HDA
- D. IDE

**Answer: B**

20. What is the role of the back-end in an intelligent disk system?

- A. To communicate between Tag RAM and data store
- B. To communicate between the host and the storage system
- C. To move data between the host and the array cache
- D. To move data between the array cache and the disks

**Answer: C**
